

# Automated Voice Messaging

Engage, Inform and Proactively Communicate with your Customers

TouchLogic provides automated customer communication solutions that leverage current technology and the power of the telephone to allow businesses to convey information to large groups of customers in a timely and cost-effective manner.

Our automated voice messaging solution assists businesses with their customer communication campaigns by delivering professionally pre-recorded voice messages to a virtually unlimited number of customers.

This highly effective communications platform is very flexible. With capabilities such as message personalization and the ability to include press transfers, companies can quickly deliver customized and targeted customer communications.

In addition, TouchLogic is a leader in developing a range of features to facilitate campaign management and evaluation, including a self-serve portal to throttle outbound calling capacity and monitor real-time campaign activity, and detailed reporting that summarizes both aggregate and individual record results.
