

## Industries Overview

No matter what your industry practice, TouchLogic can help you with your customer campaigns by delivering voice messages in a prompt and timely fashion.

Since 1994, TouchLogic has worked with a variety of companies throughout North America to help them communicate with customers. Our automated voice messaging solutions are designed to encourage customer attention, maximize customer reach and deliver quantifiable results.

Applications for our services range from debt collections to customer surveys to customer care functions such as welcome calls, appointment reminders, credit card activations and much more. Please [click here](#) to view a detailed list of the applications of our automated customer communications.
